

Oracle NetSuite Data Migration for a Construction Company

Location:	India
Industry:	Computer Software
Products:	Oracle NetSuite Managed Service
Benefits	Beneficial to backup the transactional data files

About Company

An American technology-driven offsite construction company. The company helps transform construction related every process and product through technology.

Technology-driven efficiencies and insights have driven extraordinary productivity gains in the global economy over the last several decades. They are doing the same for building design and construction, applying many of these established tools—and inventing others—to address entrenched challenges.

Business Challenges

- To Identify the exact number of transaction and count of all AR/AP GL documents and download these transactional documents from NetSuite and upload them on Box server as well as NetSuite File Cabinet.
- To filter out duplicates files from the transactional records
- Rename each NetSuite transaction code, transaction date and relevant record name.

Solutions Offered

- To write a script to identify the unique document for download and upload function.
- Rename the file as per the transaction details in order to easily identify the correct file with their respective transaction.

Benefits

- To keep the records of transactional data as a backup and can be accessed whenever it is required.
- This activity benefits to keep all the records as per ISO standard norms and easily accessible.
