

Oracle NetSuite Integration with Micros POS for Restaurant Business

Location:	Dubai
Industry:	Food
Type:	Restaurant
Products:	NetSuite ERP

About Company

The Company is a leading chain of restaurants with wide presence in UAE market.

Business Challenges

- Currently Micros POS system is running in all restaurants across all the legal entities. Sage is used to track financial of all the legal entities.
- Each location runs its Purchases and Sales Independently on Micros, which is then entered into sage. Sage Enterprise Management is an ERP software suite that includes integrated functionality for financial management, sales, customer service, distribution, inventory, and manufacturing, and business intelligence.
- Centralized management office handling the financial (Purchase and Sale) operations.
- Conversion of BRS (Bank Reconciliation Statement) Excel file into NetSuite compatible CSV format and Manual upload of the file.

Solution offered

- Purchase of office consumables for the management offices across all the legal entities will be entered in NetSuite directly by the user. Purchase of restaurant consumables(food,beverages etc) and inventory management will be entered in NetSuite.
- For Sales, integration will be done with Micros system wherein the sales for each restaurant will be ported to NetSuite.
- User will upload bank statement received from A&H bank in Excel format on NetSuite designed custom page which will further convert the uploaded file in the Bank statement Import compatible in CSV format. User need to download the newly converted CSV file and further can be imported in the "Online Bank statement Import" screen manually.

Benefits

- Due to integration with Micros POS, it has become easy to manage each day sale.
- All the financial details like trial balance, Balance sheet, A/R, A/P are easy to access through MIS reports.
- Due to customized approach for BRS file conversion, manual intervention is avoided.
